

Risk Assessment Form

Use this form for any detailed risk assessment unless a specific form is provided. Refer to your Summary of Hazards/Risks and complete forms as required, including those that are adequately controlled but could be serious in the absence of active management. The Action Plan and reply section is to help you pursue those requiring action.

Name of Initial Assessor/Reviewer:	John McLean		Post Held:	MR Safety Expert		
Department:	Imaging		Date (Initial Review):	17/3/2015		
Subject of Assessme	nt: E.g.: hazard, task, equipment, location, peop	le				
Flood or water damage in the MRI Unit						
Hazards (Describe the h	armful agent(s) and the adverse consequences	they could cause)				
Damage to equipment, particularly whilst powered electrically, especially in the technical or equipment room where high voltage cabinets exist. Risk of electrocution to staff is highly unlikely due to considerable insulation of equipment in the MR Examination Room.						
Description of Risk Describe the work that causes exposure to the hazard, and the relevant circumstances. Who is at risk? Highlight significant factors: what makes the risk more or less serious – e.g.: the time taken, how often the work is done, who does it, the work environment, anything else relevant.						
Water ingress into electrical equipment may pose a hazard to patients and staff and may also						
damage the sensitive and expensive MRI system.						
Existing Precautions		Describe how th outcomes.	ey might fail to preven	t adverse		
local rules for the includes instruction	taff must read and sign the MRI department. This ons as to what to do in nstances such as a flood.					
If water starts to leak into either the magnet room, the console room or the computer cabinet area, hit the electrical isolator button (DO NOT QUENCH THE MAGNET) and evacuate patients and staff						

Level of Risk - Is the control of this risk adequate?

Give more than one risk level if the assessment covers a range of circumstances. You can use the 'matrix' to show how 'likelihood' and 'consequences' combine to give a conclusion. Also, be critical of existing measures: if you can think how they might fail, or how they could be improved, these are indications of a red or orange risk.

Risk Matrix

Likelihood	Impact/Consequences					
	Negligible	Minor	Moderate	Major	Extreme	
Almost Certain	Medium	High	High	V High	V High	
Likely	Medium	Medium	High	High	V High	
Possible	Low	Medium	Medium	High	High	
Unlikely	Low	Medium	Medium	Medium	High	
Rare	Low	Low	Low	Medium	Medium	

Low

Current risk level

Given the current precautions, and how effective and reliable they are, what is the current level of risk? **Green** is the target – you have thought it through critically and you have no serious worries. Devise ways of making the risk green wherever you can. **Yellow** is acceptable but with some reservations. You can achieve these levels by reducing the inherent risk and or by effective and reliable precautions.

High (Orange) or Very High (Red) risks are unacceptable and must be acted on: use the Action Plan section to summarise and communicate the problems and actions required.

Action Plan (if risk level is High (Orange) or Very High (Red)

Use this part of the form for risks that require action. Use it to communicate, with your Line Manager or Risk Coordinator or others if required. If using a copy of this form to notify others, they should reply on the form and return to you. Check that you do receive replies.

Describe the measures required to make the work safe. Include hardware – engineering controls, and procedures. Say what you intend to change. If proposed actions are out with your remit, identify them on the plan below but do not say who or by when; leave this to the manager with the authority to decide this and allocate the resources required.

Proposed actions to control the problem List the actions required. If action by others is required, you must send them a copy	By Whom	Start date	Action due date

Action by Others Required - Complete as appropriate: (please tick or enter YES, name and date where appropriate)

Report up management chain for action	
Report to Estates for action	
Contact advisers/specialists	
Alert your staff to problem, new working practice, interim solutions, etc	

Reply

If you receive this form as a manager from someone in your department, you must decide how the risk is to be managed. Update the action plan and reply with a copy to others who need to know. If appropriate, you should note additions to the Directorate / Service Risk Register.

If you receive this as an adviser or other specialist, reply to the sender and investigate further as required.
