

## **Risk Assessment Form**

Use this form for any detailed risk assessment unless a specific form is provided. Refer to your Summary of Hazards/Risks and complete forms as required, including those that are adequately controlled but could be serious in the absence of active management. The Action Plan and reply section is to help you pursue those requiring action.

| Name of Initial<br>Assessor/Reviewer | Blair Johnston | Post Held:             | Clinical Scientist |  |
|--------------------------------------|----------------|------------------------|--------------------|--|
| Department:                          | MRI Physics    | Date (Initial Review): | 24/01/19           |  |

Subject of Assessment: E.g.: hazard, task, equipment, location, people

Use of ferromagnetic sound recording equipment in the Magnet Room

Hazards (Describe the harmful agent(s) and the adverse consequences they could cause)

MRI scanners generate a very powerful magnetic field that strongly attracts ferromagnetic items into the bore of the magnet.

- Projectile risk damage to the scanner, equipment or may hit someone in its path
- Rotational risk device may rotate to align with the magnetic field

These effects are especially pronounced at higher field strengths.

## **Description of Risk**

Describe the work that causes exposure to the hazard, and the relevant circumstances. Who is at risk? Highlight significant factors: what makes the risk more or less serious – e.g.: the time taken, how often the work is done, who does it, the work environment, anything else relevant.

- This risk assessment relates to ferromagnetic sound recording equipment. If non-ferromagnetic then there is no risk from the static field.
- Anyone in the scan room when recording equipment brought in is at risk
- No risk to patients/volunteers as this equipment should not be brought in or used unless the room is empty
- There is potential for sound recording equipment to be damaged by introducing it to a large static magnetic field

**Existing Precautions** 

| Summarise current controls In place   | Describe how they might fail to prevent adverse outcomes.   |  |  |
|---|---|--|--|
| <ul> <li>Devices will be checked beforehand using a handheld magnet and will not enter the room unless deemed safe to do so by an MRSE or an HCPC registered clinical scientist under the delegated authority of an MRSE</li> <li>Staff must not stand between the device and the MRI scanner</li> <li>The equipment will not be required in the room on a regular basis</li> <li>Equipment should be brought into the room slowly</li> </ul> | There is always the potential for human error and for a member of staff to inadvertently take a strongly ferromagnetic object into the scanning room. |  |  |

## Level of Risk - Is the control of this risk adequate?

Give more than one risk level if the assessment covers a range of circumstances. You can use the 'matrix' to show how 'likelihood' and 'consequences' combine to give a conclusion. Also, be critical of existing measures: if you can think how they might fail, or how they could be improved, these are indications of a red or orange risk.

## **Risk Matrix**

| Likelihood        | Impact/Consequences |            |          |        |         |  |  |  |
|-------------------|---------------------|------------|----------|--------|---------|--|--|--|
|                   | Negligible          | Minor      | Moderate | Major  | Extreme |  |  |  |
| Almost<br>Certain | Medium              | High       | High     | V High | V High  |  |  |  |
| Likely            | Medium              | Medium     | High     | High   | V High  |  |  |  |
| Possible          | Low                 | Medium     | Medium   | High   | High    |  |  |  |
| Unlikely          | Low                 | Medium     | Medium   | Medium | High    |  |  |  |
| Rare              | Low                 | <u>Low</u> | Low      | Medium | Medium  |  |  |  |

| Current risk level   |  |   |                                       |                                    |                            |
|--|--|---|---------------------------------------|------------------------------------|----------------------------|
